

KEY FACTORS TO IMPROVE FRONTAL AND LATERAL PROTECTION OF THE SMILE IN ADULT PATIENTS

DR. JUAN CARLOS PEREZ VARELA

Nowadays , there is a clear trend towards aesthetic dentistry , and for this reason the main concern for most of the patients is to improve smile and facial aesthetics.

A pleasing appearance is an important part of our daily lives , both on the private and professional level. In this conference , we are going to highlight the importance of the orthodontics in order to improve smile aesthetics in frontal and lateral protection.

OBJECTIVES

- To know the characteristics of an ideal smile
- To know how to increase the transversal dimension of the smile
- To know how to improve the lateral protection of the smile
- To know how we can organize a multidisciplinary treatment
